	<b>Examiner</b> Mark S. Graham	<b>Art Unit</b> 3711	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicant's election with traverse of the Fig. 1 embodiment on 6/28/04 is acknowledged. The traversal is on the ground(s) that the species are sufficiently related so as to be examined together. This is not found persuasive because the applicant has not admitted for the record that the species are obvious variants of one another.

The requirement is still deemed proper and is therefore made FINAL.

Claims 14, and 16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement on 6/28/04.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13, 15, 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Maranville. Maranville discloses the claimed structure and may be used for the same purpose.

Regarding claims 7 and 19, Maranville's discs may be seen through a long window.

Concerning claim 10, note the V-shape of the bottom of the front wall as may be seen in Fig. 1.

With regard to claims 6 and 20, the protruding screw heads give the housing a rough surface.

Regarding claim 12, note bent leg 32 which is included in the mounting member structure.

Art Unit: 3711

Concerning claim 17, the angle of Maranville's device would cause a projectile to ricochet at an angle to the incoming trajectory.

Ramirez, Klein, Allison, Head, Houser, Narrow, Borthwick, and White have been cited for interest because they disclose similar devices.

Any inquiry concerning this communication should be directed to Mark S. Graham at telephone number 703-308-1355.
